

ACCESS TO PROGRAMS, SERVICES, AND ACTIVITIES –
ELEVATOR OPERATION

GA-R

Elevator controls are typically locked during normal hours of operations. When a facility will be occupied by an individual with a disability, key to operate the controls will be provided to the individual. If the individual's disability limits the ability to twist the wrist sufficiently to operate the controls, the elevator functions will be permanently unlocked or the district will provide an assistant to accompany the individual when in transit to and from all locations when a change in floor level is necessary.
